PLX Tooling

New Dual Pipe Scraper Tool, to complement the full range of PLX Tooling

In addition to our specialist fuel conveyance pipework system, PLX, we have a comprehensive range of electrofusion preparation and welding equipment. The latest addition to the range is the Dual Pipe Scraper, which enables simultaneous preparation of both the outer and the inner 63#75mm pipes. This complements our One-Weld fitting range, further reducing installation time on site, as well as assuring reliability of the weld with the high quality of the pipe preparation.

Inner and outer scraped at the same time

Easy to use, with standard power tool

Saving significant installation time (25 seconds to scrape both pipes)

High quality pipe preparation

Designed for use with PLX secondary contained close fit pipe

Industry first Dual Pipe Scraper
